## Personal Statement

- I am a frontend developer looking to make my impact in the tech space. Everyday, I always seek to be better than I was the previous and how to make my codes better and affect my environment and the internet for good. I constantly learn and having mastered HTML5, CSS3 and the basics of Javascript, I am looking to develop the more and learn more technologies to make my knowledge very solid.

- HTML5

- CSS3

- Bootstrap

- Javascript

## Employment History

## Work Experience

## Education History

Obafemi Awolowo University - March 2020 to Current

## Qualifications

## Interests and Achievements

I ve done some personal projects. I built VS Code s homepage clone and my github repository page clone among other challenges I took from frontendmentors.
